Alexander Nataniel Castillo Centellas

Fullstack & Cloud Engineer | Backend | DevOps
La Paz, Bolivia (UTC-4, open to remote) | +591 75213030 | nnvaldev@gmail.com | github.com/nnvaldev | linkedin.com/in/nvaldev

Summary

Fullstack & Cloud Engineer with **2+ years of production experience**: **Python (FastAPI)** backend, **React / TypeScript** dashboard, a **Flutter** app published on both stores, and **AWS (Fargate, CDK)** infrastructure with zero-downtime CI/CD. My side projects use real tests, CI, Docker, **Terraform** and deploys with rollback.

Technical Skills

- **Backend & Data:** Python (FastAPI, SQLAlchemy Async, Alembic), PHP (Laravel), Node.js (NestJS), PostgreSQL, Redis, Prisma, queues, WebSockets.
- **Frontend:** TypeScript, React, Vue 3, Next.js, Inertia, Astro, Tailwind CSS, Zustand, Vitest, Playwright.
- **Cloud & DevOps:** AWS (ECS Fargate, CDK, RDS, ElastiCache, WAF, CodeBuild, CloudWatch), Docker, Terraform, GitHub Actions, Oracle Cloud, Vercel, Linux.
- **Mobile & Design:** Flutter, Firebase (push), App Store and Google Play releases, Figma (design systems).

Experience

Fullstack & Cloud Engineer 2025 – Present
Trabajito.bo *La Paz, Bolivia*

- **Cloud & IaC:** Designed and led the migration to **AWS Fargate** with **AWS CDK**: ECS with autoscaling, ALB, WAF, RDS, ElastiCache and Secrets Manager, with isolated Staging and Production environments.
- **CI/CD:** Integrated GitHub with **AWS CodeBuild** for automated, *zero-downtime* deployments.
- **Backend: Python (FastAPI, SQLAlchemy Async)** on **PostgreSQL** and **Redis**, with WebSockets.
- **Web & Mobile: React + TypeScript** dashboard (Feature-Sliced Design, Zustand, Vitest, Playwright) and a **Flutter** app (Firebase push) released on the App Store and Google Play.
- **Observability: CloudWatch** alarms that reduced incidents; **Figma** component system.

Selected Projects

AgendaPro – Online Booking SaaS October 2026
github.com/nnvaldev/agendapro *Laravel 13 | Vue 3 | PostgreSQL*

- **Product:** Multi-business SaaS with public bookings (no sign-up), a **Vue 3 + TypeScript** dashboard (Inertia) and **Redis**-queued emails (confirmations with .ics, scheduled reminders).
- **Consistency:** No double bookings thanks to a PostgreSQL **EXCLUDE** constraint over time ranges, tenant isolation with global scopes; 92 tests against real PostgreSQL and **PHPStan** level 7.
- **DevOps: GitHub Actions**, **FrankenPHP** image (automatic HTTPS, non-root), Oracle Cloud server in **Terraform** tested with a mock provider, and automated deploys with health checks, rollback and backups.

IDM E-Commerce – Multi-vendor Marketplace and ERP March 2026 – June 2026
Capstone project (UMSA) | github.com/nnvaldev/IDM-Ecommerce-System *FastAPI | React*

- **Sales & inventory:** B2C, B2B credit and POS across three warehouses with QR transfers; **FastAPI + SQLAlchemy Async** backend with pessimistic locking (`SELECT ... FOR UPDATE`) on every stock mutation.
- **SIAT e-invoicing** (simulated client) with contingency mode, batch retries and idempotent issuing; **React + TypeScript** dashboard with RBAC and Recharts reports.

JobBoard Pro – Job Board August 2026
github.com/nnvaldev/JobBoard *Next.js 15 | NestJS | Prisma*

- pnpm monorepo with **Next.js 15** and **NestJS 11**: JWT with transparent renewal, role and ownership guards, **Prisma**.

La Paz Tour – Accessible Tourism Guide July 2026
la-paz-tour.vercel.app *Astro | Leaflet*

- **Leaflet + OpenStreetMap** with no paid APIs, accessibility filter, live 8-currency converter and library-free ES/EN/PT i18n.

Education

Universidad Mayor de San Andrés (UMSA) 2023 – Present
B.Sc. in Computer Science, Software Development track (8th semester) *La Paz, Bolivia*

Languages

Spanish (native) | English (technical reading and writing)
